Chess App

A chess app that with proper gameplay and able to store all previous games in a database and load up the most recent games played, I will use FEN notation to store the state of the game. I will have a login and registration screen so you can store games per the user.

Features

- Login
- Registration
- Chess logic
- Local storage of most recent game (if unfinished)
- Able to load up a new game
- Load from FEN
- Connection to SQL database
